**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1, 3-5 and 8-21 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 and IDS forms of record. None of the references or combinations thereof anticipate or make obvious removing at least some of the first material mass while the retaining structure physically contacts the at least some of the conductive capacitor electrode material; after removing at least some of the first material mass, incorporating the conductive capacitor electrode material into a plurality of capacitor devices; and wherein the first material mass is over the retaining structure as required by present Claim 1 and dependent Claims thereof. Moreover, the cited prior art does not anticipate or make obvious the first material comprises borophosphosilicate glass; a wet etch is utilized to remove at least some of the first material; and the retaining structure comprises silicon nitride and a material having increased selectivity to borophosphosilicate glass than silicon nitride during the wet etch as required by Claim 12 and dependent Claims thereof. Therefore, the present Claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
